

## Network Communication Review

1. What does OSI stand for in the OSI Reference Model?
2. Place the OSI layers in order starting from layer 1 to layer 7.
3. What does the Physical layer of the OSI Reference Model encompass?
4. What does the Data Link layer of the OSI Reference Model encompass?
5. What does MAC in MAC address stand for?
6. What is a MAC address?
7. What does LLC in MAC address stand for?
8. What is a LLC?
9. What does the Network layer of the OSI Reference Model encompass?
10. What does the Transport layer of the OSI Reference Model encompass?
11. What does the Session layer of the OSI Reference Model encompass?
12. What does the Presentation layer of the OSI Reference Model encompass?
13. What does the Application layer of the OSI Reference Model encompass?
14. What devices work at layer 1 of the OSI model?
15. What devices work at layer 2 of the OSI model?
16. What devices work at layer 3 of the OSI model?
17. What are the two sublayers of layer 2 of the OSI model?
18. Is the OSI model a theoretical concept to help individuals to understand the complexity of networking or is it a real protocol?
19. What is the actual protocol for the majority of devices on a network?
20. What protocols are part of the TCP/IP suite?
