

History of Networking Review

1. What major event in history caused the creation of the Advanced Research Project Agency (ARPA)?
2. Did Al Gore invent the Internet?
3. JCR Licklider will influence the development of the first computer network. What paper and phrase are associated with his work on theorizing the development of networks.
4. What individual puts a plan together to create the ARPANET in 1968?
5. What year was the ARPANET created?
6. What is the name of the protocol for the ARPANET?
7. In 1971, he invents electronic mail?
8. What year was electronic mail functionality added to the ARPANET?
9. What networking events happen in 1973 concerning Ethernet and the Internet?
10. What occurs with networking protocols in 1983?
11. What year was the Domain Name System (DNS) introduced?
12. What were the six domain extension first released in 1984.
13. In 1991, www is launched. What does www stand for?
14. What three companies start their dial up service in 1995?
15. What year does Google open its first office in California?
16. During 2001, what viruses and worms infected entire Local Area Networks connecting to the Internet costing company's money to reload all of their computers.
17. What versions of Windows Enterprise server have had Kerberos security?
18. What year is www.youtube.com launched?
19. In a few cases, governments have shut off access to the Internet. Builders believe that the United States could do the same, but in reality, TCP/IP networks really just do what?

20. Match these networking contributors.

- a. Cerf
- b. Kahn
- c. Metcalfe
- d. Tomlinson
- e. Licklider
