

## PC Hardware Identification Exercise 2

Name: \_\_\_\_\_ Date: \_\_\_\_\_

Identify the items by placing the correct letter next to the description.

	Game port
	Jumper set on Cable select
	ATX 1.0 P1 connector
	RJ45 crimper
	ATA 66 or above connector that connects into the motherboard
	Processor socket
	Pointing device roller ball traction pad
	Molex connector
	PATA connector for the primary IDE device
	Device to remove heat from the integrated circuit
	Ground connector
	PCI edge connector
	DVI connector
	Neutral power connector
	DDR2 RAM
	10 Mbps network connector
	80 conductor ribbon cable
	VGA connector
	4 pin power connector on a IDE device

## PC Hardware Identification Exercise 2

	DVI to VGA convertor
	BIOS chip
	DDR RAM
	CMOS battery
	1.5 mm TRS jack for a speaker
	Floppy disk power connector
	120 phase connector
	CMOS Jumper
	34 pin connector
	ATX 2.0 P1 connector
	40 Pin Parallel ATA connector
	40 pin communication connector on a IDE device
	Coax cable
	PATA connector for the secondary IDE device
	Transistor
	PS2 6 pin circular DIN connector
	PCI Express expansion port
	PCI expansion slot
	40 conductor ribbon cable
	1.5 mm TRS jack for a microphone
