Table of Contents

Chapter 1. The World Class CAD Training Method

Unit 1

Chapter 2. The Rectangular Problem
Chapter 3. Dimensioning the Rectangular Problem
Chapter 4. Placing Notes on the Rectangular Problem
Appendix A Practice Problems

Unit 2

Chapter 5. The Circular Problem
Chapter 6. Dimensioning the Circular Problem
Chapter 7. Placing Notes on the Circular Problem
Appendix B Practice Problems

Unit 3

Chapter 8. Drawing Borders
Chapter 9. Drawing Title blocks
Appendix C Practice Problems

Unit 4

Chapter 10. The Bracket Problem
Chapter 11. Dimensioning the Bracket Problem
Chapter 12. Placing Notes on the Bracket Problem
Appendix D Practice Problems

Unit 5

Chapter 13. The Architectural Floor Plan
Chapter 14. The Next Step
Appendix E The First Floor Plan

Acknowledgement

I would like to thank the following individuals who have helped make this website textbook and video learning material. First and foremost this project would not have been possible without a supporting family which includes my loving wife, Donna and my additional typing crew, my son Joseph and my daughter Elizabeth. I give many thanks to the professional staff and students in the CAD department at Technology Education College (TEC), a Kaplan Higher Education college and to the many central Ohio businesses that employ the graduates. Special recognition goes to Mark Bughman, my partner and co-developer of many of the units described in the series of training manuals.

Professionally I would like to acknowledge my mentors who coached and trained me throughout the years: Clyde Terry, Sharon Thesing, Gary Weltlich, Ed Runyon, Eric Darwin, Ed Reel, Chuck Meridith and Tom Greenhouse. These designers, programmers, engineers and managers never accepted being in second place and gave a good example of developing a World Class standard.
