Open a new file and name the file, <Your Name> Midterm. Create a table as shown below. Format the text, text color and cells to display a beautiful spreadsheet that is easy to read. Find the total cost for each inventory using formulas. The total cost is the individual cost times the quantity. Find the total of both inventories using formulas. Find the cost of the highest, lowest and average knife in both the old and new inventory by formula. Make both pie charts as shown, Old Knife Inventory and New Knife Inventory.
