

Creating a WINS Server

May 24, 2012

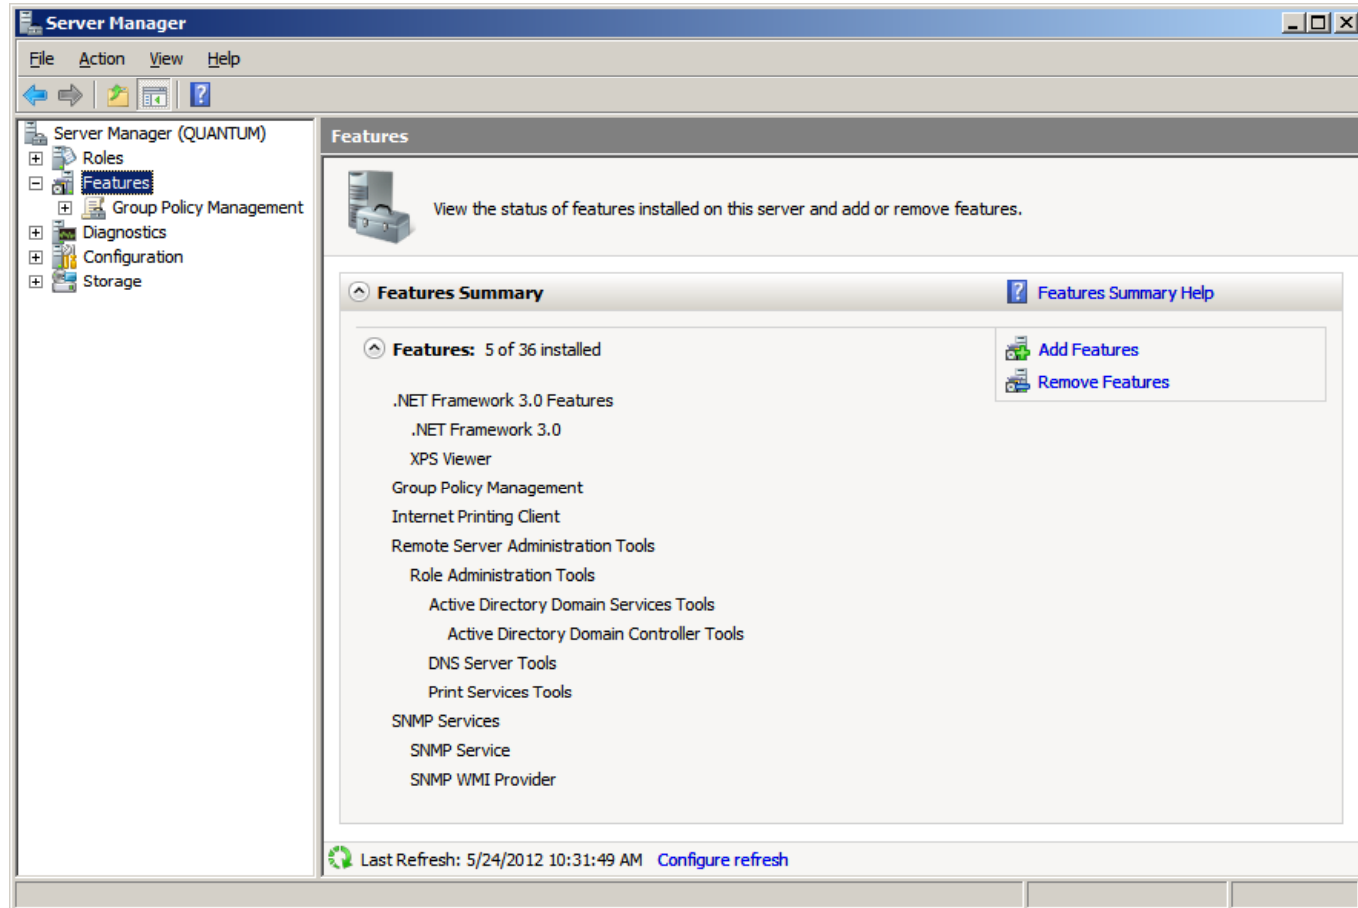

Why Setup a WINS Server

Windows Internet Name Service (WINS) resolves IP addresses for NETBIOS the maximum 15 character computer name.

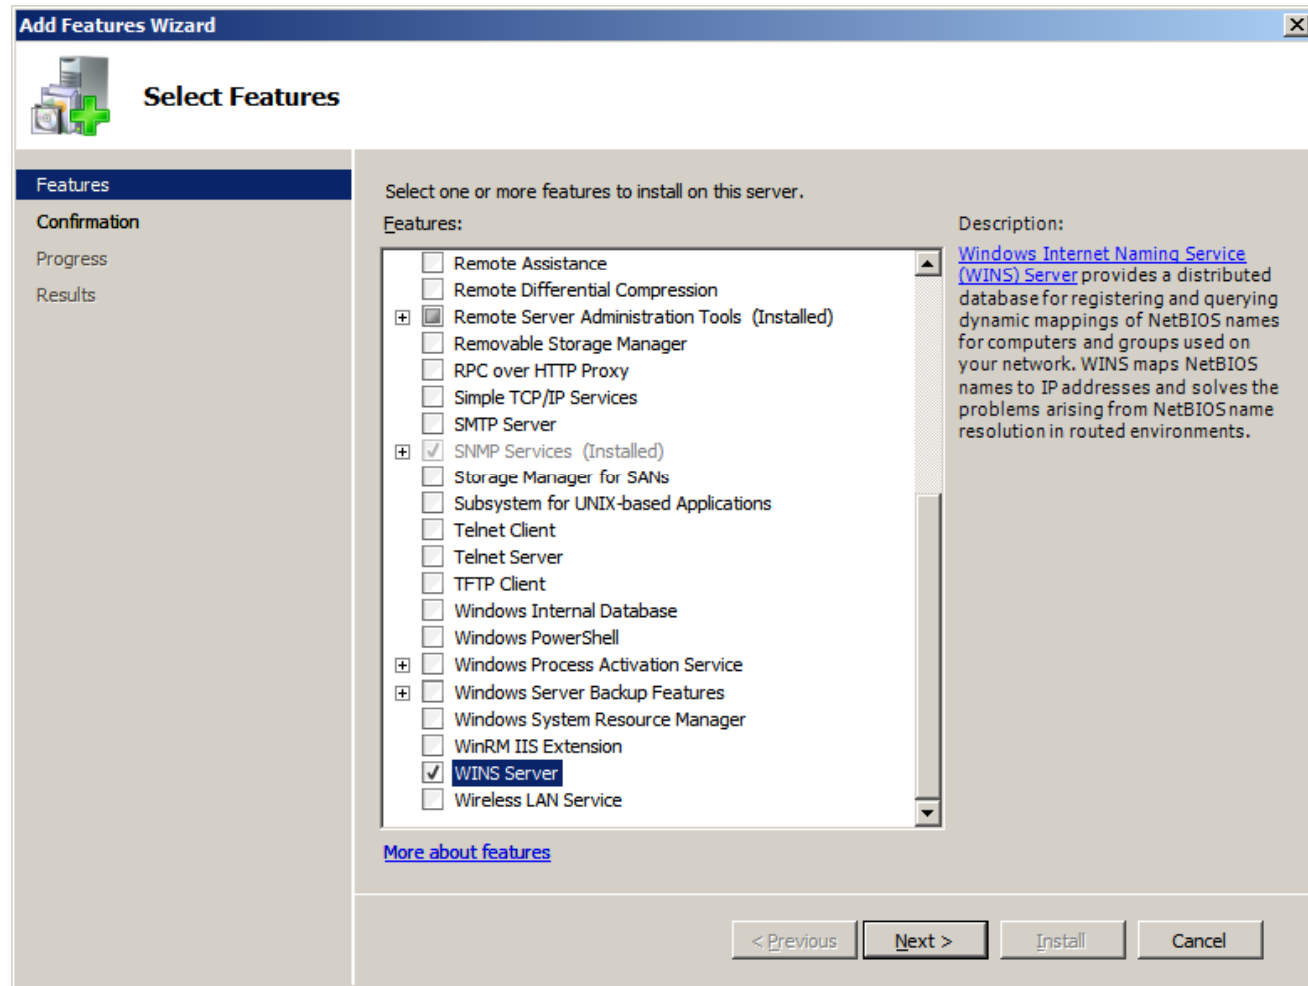

Server Manager - Features

We click the Start button and select Administrative Tools on the Start Menu. We pick Server Manager.

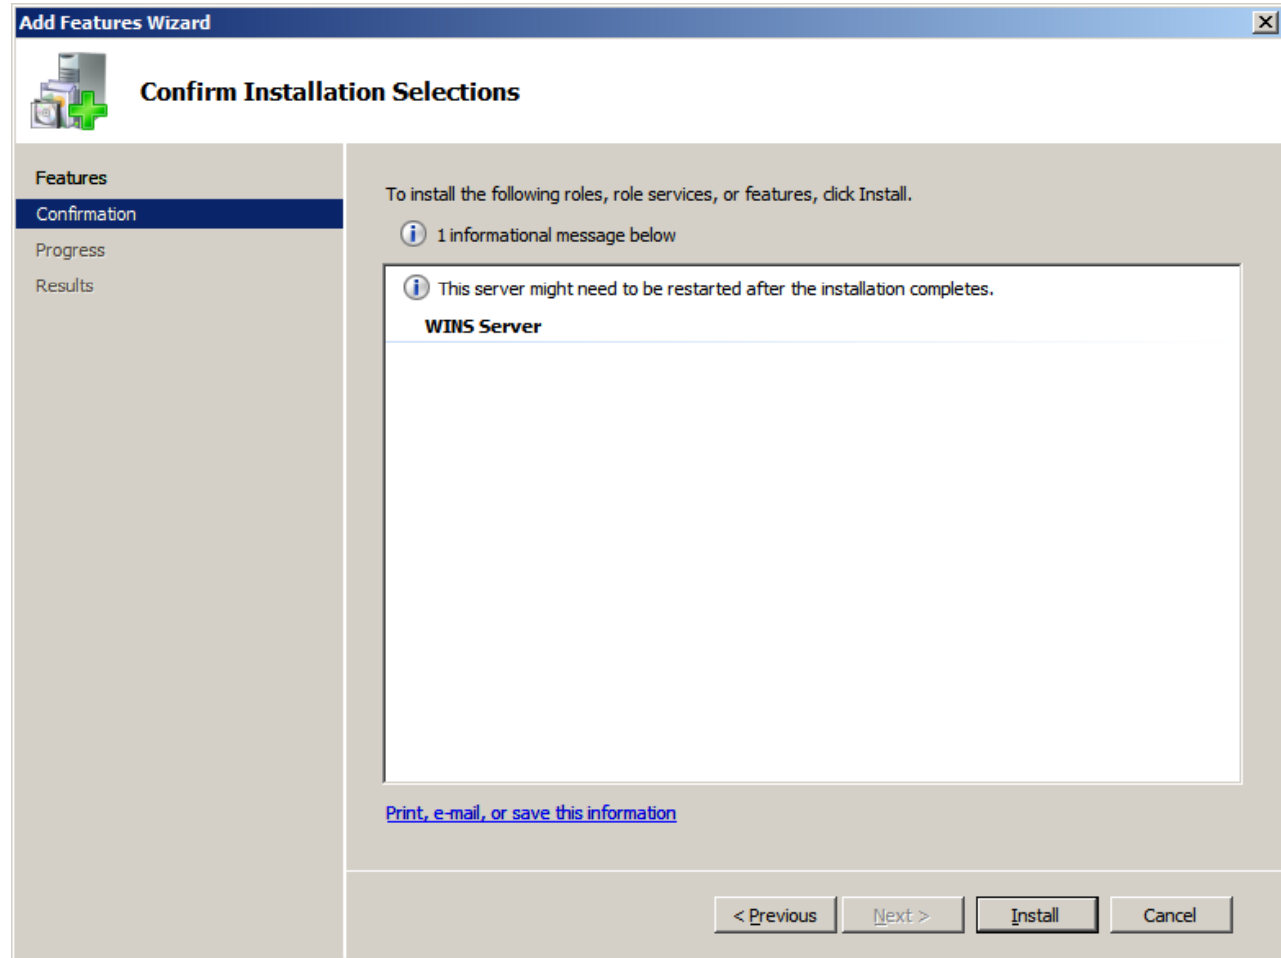

Add WINS Server Feature

In the Select Feature window, we annotate WINS Server.

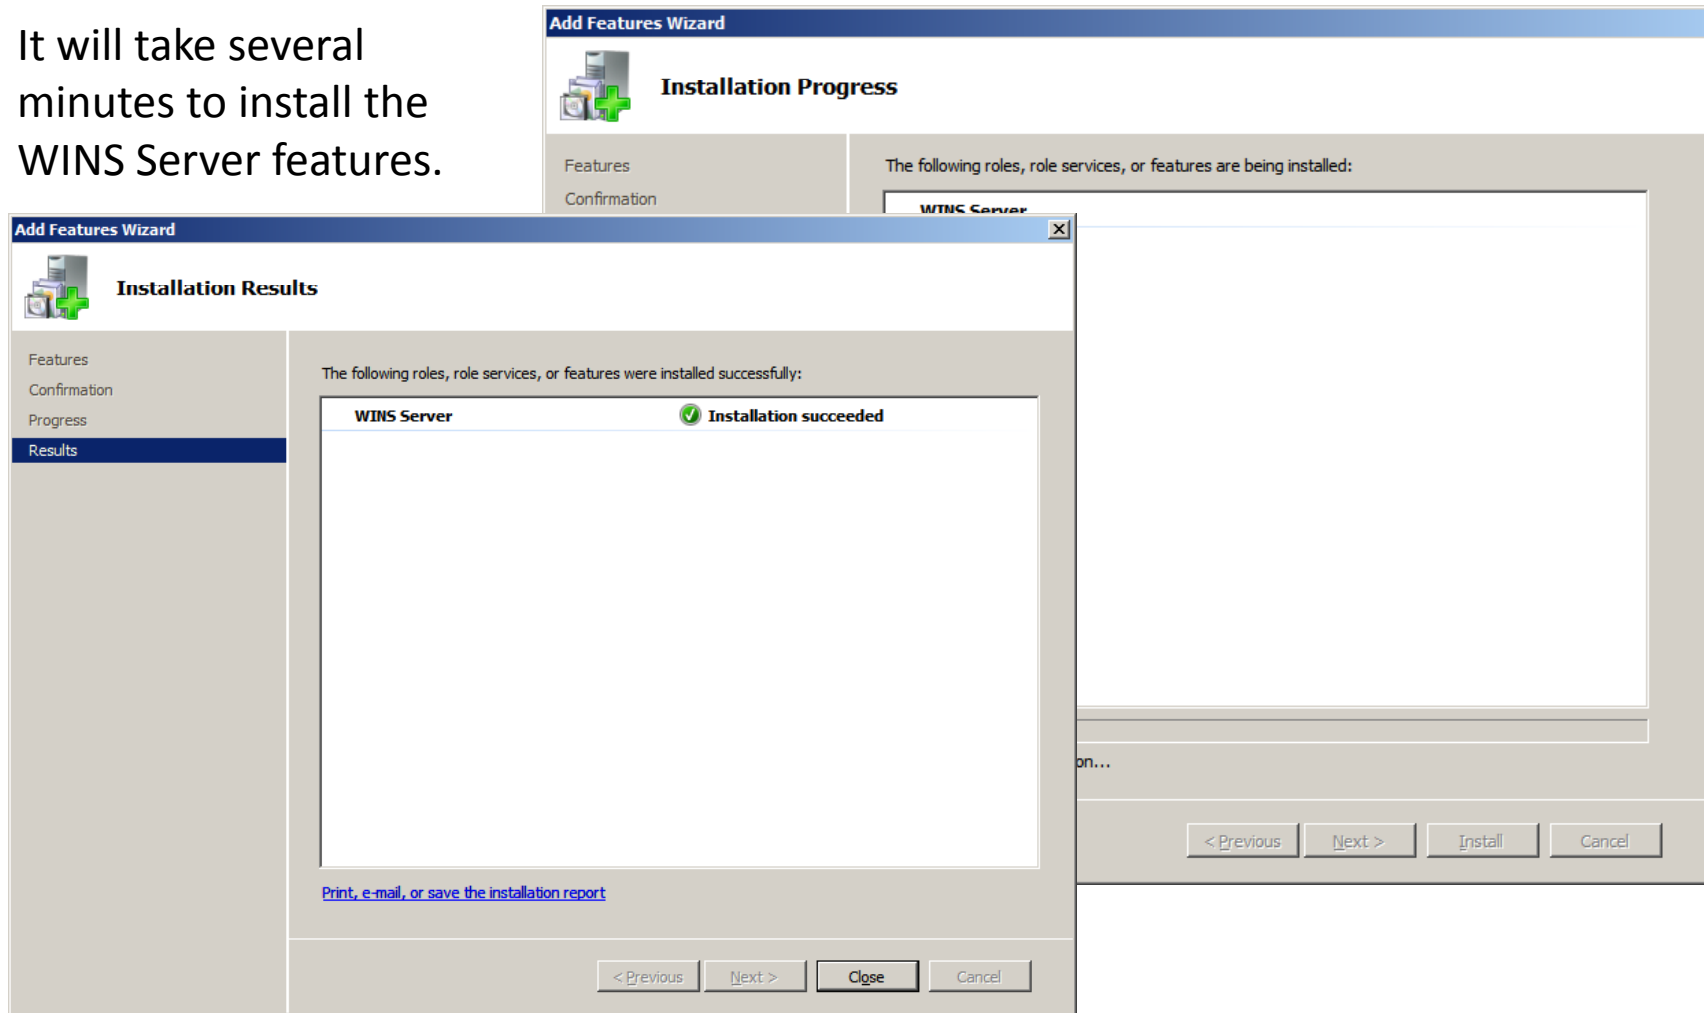

Confirm Installation Selections

We confirm our selection and now press the Install button.

Install the WINS Server Feature

It will take several minutes to install the WINS Server features.

WINS Console

We go to the Administrative Tools menu and select WINS from the bottom of the list.
