

## Server Bid 1

Design a Windows Server 2008 file server for a small office. The customer is:

Dominique Smart  
President  
Smart Legal, LLC  
6897 Mercy Lane  
Dayton, Ohio 99888  
667-999-7979  
dsmart@smartlegal.com

Mr. Smart wants a server for his office that already has four Windows 7 computers in the network. The server should have his four employees, who are Tracy Smart, Tonya Risk, Mike Taylor and himself. It will be a RAID level 1 computer. He does not want the server in line with the Internet (not a NAT server).

Presently his wired network for his LAN has a connection to the Internet using a local Internet Service Provider (ISP). He wants a network laser printer in the center office room.

Create a diagram, spreadsheet quote and cover letter for the job and send the documents to your instructor with attachments. Make an informative PowerPoint presentation highlighting the features of the network you designed. Include with the quote a step by step procedure for setting up the server, so it can be followed in case of a disaster.
