

## Build a Windows 2008 Server Project 4

<b>Scope</b>	Build a primary and secondary file server for a college dormitory with 100 users, three supervisors and two network administrators using two Windows 2008 Servers. The computers will have two 2 TB hard drives setup using RAID 1. The users will be saving their files created on Apple and Windows computers and connect to the machines by 100 Mbps Ethernet cable. The servers should have two network interface cards.
<b>Active Directory</b>	All 100 users will be loaded in Active Directory and they can only read and write to their own project folder. Supervisors will have their own accounts and have full permissions to read and write to all folders. Administrators will have their own accounts and have full permissions to read and write to all folders.
<b>Security</b>	Username and passwords will conform to institution rules used in other departments.
<b>Roles</b>	Active Directory, DNS, File services
<b>Documentation</b>	<p>Create an installation manual showing every step to build the two servers for disaster recovery purposes.</p> <ol style="list-style-type: none"><li>1. Title page</li><li>2.
