

## PC Hardware Identification Exercise

Identify the items by placing the correct letter next to the description.

	40 Pin Parallel ATA connector
	Thermal Compound
	RJ45 crimper
	4 pin power connector on a IDE device
	Game port
	DDR RAM
	ATA 66 or above connector that connects into the motherboard
	40 conductor ribbon cable
	Ground connector
	120 phase connector
	80 conductor ribbon cable
	40 pin communication connector on a IDE device
	Molex connector
	Jumper set on Cable select
	BIOS chip
	Processor socket
	Floppy disk power connector
	ATX 1.0 P1 connector
	PATA connector for the primary IDE device
	PATA connector for the secondary IDE device

## PC Hardware Identification Exercise

	PCI expansion slot
	CMOS battery
	PS2 6 pin circular DIN connector
	PCI edge connector
	Neutral power connector
	34 pin connector
	DVI connector
	10 Mbps network connector
	Device to remove heat from the integrated circuit
	VGA connector
	Pointing device roller ball traction pad
	DVI to VGA convertor
	USB Type A connector
	USB Type B connector
	AGP connector
	PCI Express connector
	Power Supply auxiliary connector
	Microphone jack
	Speaker jack
	DVD or CD Tray Ejector
